Inorganic Chemistry
Additions and Corrections

2003, Volume 42

Radu Silaghi-Dumitrescu, Ioan Silaghi-Dumitrescu, Eric D. Coulter, and Donald M. Kurtz, Jr.*: Computational Study of the Non-Heme Iron Active Site in Superoxide Reductase and Its Reaction with Superoxide.

Pages 452 and 453. The paragraph headed "Computed Electronic Absorption Spectrum" and the caption below Figure 4 incorrectly refer to the ferric-peroxo model **4**, instead of the ferric-hydroperoxo model **6**. As stated in footnote 25, the results reported in this paragraph and shown in Figure 4 are for $S = {}^1/_2$ model **6**, not model **4**.
