Henry S. Rzepa* and Marion E. Cass: In Search of the Bailar Twist and Rây–Dutt Mechanisms That Racemize Chiral Trischelates: A Computational Study of Sc^{III} , Ti^{IV} , Co^{III} , Zn^{II} , Ga^{III} , and Ge^{IV} Complexes of a Ligand Analogue of Acetylacetonate

Page 8029. *Within* Figure 3, the formula for the normalized bite has an error. The formula *incorrectly reads* “Normalized bite = $b = d_{\text{A-A}}/l_{\text{A-A}}$ ”. However, it *should read* “Normalized bite = $b = d_{\text{A-A}}/d_{\text{M-A}}$ ”. The description of the formula within the caption for Figure 3, as well as within the body of the text of the paper, is correct.

Shaojun Guo and Erkang Wang*: One-Pot, High-Yield Synthesis of Size-Controlled Gold Particles with Narrow Size Distribution

Page 6741. In the Experimental Section, the last line should read as follows: “First, 2 mL of 25 mM HAuCl_4 aqueous solution and 1 M PVP aqueous solution with the initial molar ratios of 20:1, 5:1, and 1:1 of PVP to gold (corresponding to samples 1, 2, and 3, respectively) were placed in a small beaker.”

Page 6741. The caption of Figure 1 should be changed to “Typical FE-SEM images of sample 1 (PVP to gold ratio of 20:1) ...”.

Page 6742. The caption of Figure 2 should be changed to “XRD (A) and XPS pattern (B) of sample 1 (PVP to gold ratio of 20:1) ...”.
