

# Potentially Deadly Carcinogenic Chromium Redox Cycle Involving Peroxochromium(IV) and Glutathione

Roberto Marin, Yachna Ahuja, Glen P. Jackson, Unige Laskay, and Rathindra N. Bose\*

*Journal of the American Chemical Society* **2010**, 132, 10617–10619 DOI: 10.1021/ja102173v

Page 10617. Dr. Glenn Jackson and Unige Laskay were inadvertently omitted from the author list.

Page 10619. Addition to ref 13: Data for Figure 2 were collected on a Bruker Esquire LC. The source temperature and voltage were 35 °C and –2500 V, respectively. The capillary voltage offset was 35 V. The use of this exact piece of equipment was inadvertently omitted.
