

β -Directing Effect of Electron-Withdrawing Groups at O-3, O-4, and O-6 Positions and α -Directing Effect by Remote Participation of 3-O-Acyl and 6-O-Acetyl Groups of Donors in Mannopyranosylations [*J. Am. Chem. Soc.* **2009**, *131*, 17705–17713]. Ju Yuel Baek, Bo-Young Lee, Myung Gi Jo, and Kwan Soo Kim*

Page 17710, ref 30. An article by Nicolaou et al. should be cited as ref 30c.¹

Supporting Information, Page S127. The mass spectrum for the mixture containing a bicyclic product with a seven-membered trichlorooxazepine ring on page S127 in the Supporting Information was incorrect. The correct spectrum is presented in the accompanying Supporting Information.

Supporting Information Available: Corrected mass spectrum for the mixture containing a bicyclic product with a seven-membered trichlorooxazepine ring. This material is available free of charge via the Internet at <http://pubs.acs.org>.
