Christelle Hureau, Sihem Groni, Régis Guillot, Geneviève Blondin,* Carole Duboc, and Elodie Anxolabéhère-Mallart*: Syntheses, X-ray Structures, Solid State High-Field Electron Paramagnetic Resonance, and Density-Functional Theory Investigations on Chloro and Aqua Mn^{II} Mononuclear Complexes with Amino-Pyridine Pentadentate Ligands

Page 9240. In the Material and Methods section, describing the synthesis of ligands L_5^2 and L_5^3 , the first step of the synthesis of L_5^2 and L_5^3 ligands was performed in methanol and not in diethylether. The correct sentence should be as follows:

Step 1: Synthesis of amina (B² and B³). Twenty millimoles of A² (respectively A³) were dissolved in 100 mL of methanol.

The correct Scheme 1 is as follows:

Scheme 1
