

## Additions and Corrections

---

2001, Volume 40

**Bernhard Spingler, Douglas A. Whittington, and Stephen J. Lippard\***: 2.4 Å Crystal Structure of an Oxaliplatin 1,2-d(GpG) Intrastrand Cross-Link in a DNA Dodecamer Duplex

Page 5601 and Supporting Information. The nucleobases in strand II were labeled incorrectly in Tables 2, S7, and S8. The conformational parameters for the DNA are correct in each case, but the labels in Table 2 and Table S7 should read (from top to bottom) 32G, 31G, 30A, 29G, 28A, 27C, 26C, 25A, 24G, 23A, 22G, and 21G. In Table S8, the labels should read (from top to bottom) 32G/G, 31G/A, 30A/G, 29G/A, 28A/C, 27C/C, 26C/A, 25A/G, 24G/A, 23A/G, 22G/G.
