

**Correction to Synthesis and Characterization of Luminescent Rhenium(I) Tricarbonyl Diimine Complexes with a Triarylboron Moiety and the Study of Their Fluoride Ion-Binding Properties**  
[*Inorg. Chem.* **2009**, *48*, 9664 DOI: 10.1021/ic900803a].  
Siu-Tung Lam, Nianyong Zhu, and Vivian Wing-Wah Yam\*

Pages 9668–9669. We have discovered a typographical error that concerns the  $^{19}\text{F}$  NMR characterization of one of the rhenium(I) alkynyl complexes. The description was carelessly written as “Two distinct signals...,<sup>41</sup> causing a downfield shift of the signal.” The correct description of the sentence should read as follows: “Two distinct signals were observed at  $\delta -120$  ppm and  $\delta -151$  ppm, which were assigned to the free fluoride ions and the boron-bound fluoride, respectively, based on the chemical shifts of related compounds reported in the literature,<sup>41</sup> of which a similar upfield shift of the signal has also been observed.” The authors apologize for any inconvenience caused by this error.
