

Correction to “Light-Tunable Plasmonic Nanoarchitectures Using Gold Nanoparticle–Azobenzene-Containing Cationic Surfactant Complexes”

Liudmila Lysyakova, Nino Lomadze, Dieter Neher, Ksenia Maximova, Andrei V. Kabashin, and Svetlana Santer*

J. Phys. Chem. C **2015**, *119* (7), 37623770. DOI: 10.1021/jp511232g

Figure 4 in the original manuscript should be corrected as follows:

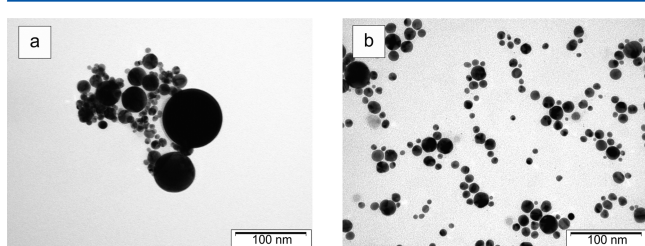

Figure 4. TEM micrographs of the gold–surfactant complexes from (a) region II and (b) region III.

Along with the changes to Figure 4, on p 3766 starting two lines above Figure 4 and extending six lines, the text should be replaced by

“In accordance with conclusions from the studies above, the TEM micrographs of dried dispersions from region II (Figure 4a) display particle aggregates, comprising not only densely packed gold nanoparticles but also larger uniformly shaped objects. We assign the latter to gold clusters. The diameter of the clusters was estimated as 100 ± 20 nm on the basis of TEM. The volume fraction of gold aggregates dominates over the single particles in region II. In contrast, the TEM of dried dispersions from region III (Figure 4b) only exhibits isolated nanoparticles or ensembles of loosely packed particles, meaning that the single particles are stabilized by the surfactant molecules.”

Related to the text corrections above, refs 43 and 44 should be removed, refs 45 and 46 should be numbered as 43 and 44, respectively, with the corresponding re-referencing on p 3768.

A typographic error was found on p 3767, second column, “($\tau \approx 20$ h)” should be replaced with “($\tau \approx 60$ h)”. Related to this change, on p 3769, “20 h” should be replaced with “60 h”.

The corrections requested above have no impact on the conclusions stated in the paper.
